Practices XML

1.- Representation of a curriculum vitae in XML.

The data to be represented are as follows:

- Name and surname
- Year of birth
- Residence
  - City
  - Country
- Contact details
  - Telephone
  - Email
  - LinkedIn profile
- Brief general description
- List of competences indicating name and level.
- Academic background, with degree, training institution and year of degree.
- Professional experience, specifying the position, the company, the year you started and the year you finished.

2.- Representation of a tourist trip in XML

Represent a tourist trip in an XML document. It must contain the following data:

- Name and surname of the customers
- Start date
- End date
- Origin of the trip (This origin can come with HTML tags to underline or make bold)
- List of destinations, each of them with the following information
  - Name of city
  - Name of hotel
  - Number of nights
- Price of the trip

3.- XML student record

Represent in an XML document the contact details of a student. Uses namespaces.

For the student you have the following data

- First name and surname
- Address
  - Street
  - City
- Age

For the father

- First name surname
- Address
  - Street
  - City
- Telephone

For the mother

- First name surname
- Address
  - Street
  - City
- Telephone
